WORK EXPERIENCE(FREELANCING)

Live Project – Full Stack Developer

[livique.co.in](#)

Developed and maintained a live e-commerce platform providing end-to-end online shopping experience for users. Built RESTful backend services to manage product listings, user authentication, cart, and order workflows. Integrated secure checkout and optimized database queries to improve page load time and overall performance. Collaborated with design and business teams to implement scalable features and enhance user experience.

Live Project – Software Developer

[blueberryfieldsschool.com](#)

Developed a live school information website for students, parents, and faculty. Added admission details, school reviews, and feedback features for parent engagement. Implemented contact and feedback forms integrated with Google Sheets for data storage. Integrated Google Maps to display accurate school location and improve accessibility.

PROJECTS

Quick Bytes – Home Made Food Delivery

Built a responsive web application for buying and selling homemade food with live delivery tracking. Developed user authentication, dashboards, food listings, cart, and checkout using React.js. Integrated Google Maps API for real-time location tracking and delivery status updates. Implemented an AI-powered chatbot for personalized meal recommendations. Optimized responsive UI and performance to ensure smooth user experience.
